Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following:

the spacing of the lines of the specification is such as to make reading and entry of amendments difficult. New application papers with lines double spaced on good quality paper are required; and,

a separate application is described in the specification. If this application is considered a "related" application, it must be listed under a separate heading "Related applications" including its current status.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites elements that relate to "user queries" and elements that include recitations "that may be used in a query". It is confusing what elements is part of the user query.

Claims 1-18 recite "system" which is vague and indefinite since a system may be one of several different statutory classes of invention (including a method or an apparatus). Applicant must indicate on the record what statutory class of invention the system claims belong to. For the purposes of this examination these claims are considered method.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-18 are rejected under 35 U.S.C. 101 as non-statutory. The method claims as presented do not claim a technological basis in the body of the claim. Without a claimed basis, the claim may be interpreted in an alternative as involving no more than a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural / functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669,

1671 (Bd. Pat. App. & Inter. 2001) – used only for content and reasoning since not precedential].

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-18 rejected under 35 U.S.C. 103(a) as being unpatentable over Hanson et al in view of Steele et al.

Hanson et al discloses a system for assigning value to listings correlated to user queries. There is disclosed lower and higher level target points (201) with bids defining a value of the target points (206, 208). A listing entity selects particular information comprising a listing that is presented to a user in response to a query from the user (fig 4). The target points describe geographic information (zip codes). Wireless networks are disclosed (fig 10) using sound as conveying voice information (col 8, lines 38).

Hanson et al does not explicitly disclose:

target points organized as a “pyramid”; and,
“handles” or comparisons of “handles”.

Steele et al discloses "pyramid" organization (fig 5 – smaller items above larger items below) and handles (fig 5 – categories such as music, talk etc).

It would have been obvious to one with ordinary skill in the art to include "pyramid" organization to Hanson et al because Steele et al teaches hierarchal organization for ease of use (para 0018).

It would have been obvious to one with ordinary skill in the art to include handles to Hanson et al because Steele et al teaches personal customization of records (para 0019).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schreiber et al, Chen, Lee et al, Culliss, and Davis et al disclose value assignment.
